Respirator Fit Test Fact Sheet

Respirators are an effective method of protection against hazardous materials when properly selected and worn. When you wear a respirator you should follow these guidelines.

1. Read and heed all instructions provided by the manufacturer on use, maintenance, cleaning and care, as well as any warnings regarding the respirators limitations.
2. A label or statement of certification should appear on the respirator or respirator packaging to tell you what the respirator is designed for and how much it will protect you.
3. Do not wear your respirator into an atmosphere containing contaminants for which your respirator is not designed to protect. (For example, a respirator designed to filter dust particles will not protect you against gases).
4. Every time you wear a respirator, make sure it gives you a good seal by checking the fit to your face before each use.
5. Inspect the respirator for any defects making sure it is clean and check all seals of the respirator.
6. Facial hair that comes between the sealing surfaces of the face piece and the face or that which interferes with value function shall prohibit the use of the respirator. All facial hair must be removed with the exception of a mustache.
7. Report any change that could affect respirator fit to your employer such as facial scarring, dental changes, cosmetic surgery, or a change in weight of plus or minus 10 LBS.
8. Your fit test is specific to the mask type and manufacturer you are being fit for. If the type or manufacturer of your mask changes, you will need to be refit.
9. Please revert to OSHA RESPIRATOR STANDARD 1910.134 for further information on the standard. Check with your safety officer for assistance with regulations.
10. Never use alcohol to clean respirator mask. Do not use any cleaner with fragrance. Use a specialized cleaner or plain soap and water.
11. Always allow mask to air dry in a well ventilated area following each cleaning.
12. Change cartridges as often as needed. If the respirator is used for paint, change the pad frequently if not better, change the cartridge. If used for block work, change cartridges frequently (Daily if needed, minimum of weekly).
13. Your fit test is good for a period of one year.
14. Your respirator is provided for your safety. Be sure you understand how, why, and when to use it.
